

# TACTICAL CARRIER VEST BR152S5

## TECHNICAL DATASHEET

The vest BR152S5 is a slightly sturdier than the BR152. It was designed for external wear and has the option to contain soft, supplemental hard, or both types of ballistics protection plates. It offers the MOLLE attachments systems which enables the user to add additional gear and cargo bags. It has options of adjustments with velcro, for comfortable wear on the shoulders and on the sides, and extra adjustment is possible with the elastic band with velcro, on the inner side. This model has sturdier and reinforced shoulder bands, and side ballistic overlap. The carrier has the options for adding various velcro options for the patches and the back side has plenty of empty surface, so it is possible to include reflective print, and if there is the need to conceal that, there is the possibility to do that as well, with the pull-out fabric. The inner side is lined with foam, which contain air channels, that offer extra cooling to the user. For fast vest removal, there are quick-release buckles available on the shoulder and the sides part. The vest has extra storage pockets.

### PRODUCT CODE

- Unisex: BR152S5

### MATERIAL
