

TACTICAL CARRIER VEST BR169S1

TECHNICAL DATASHEET

The vest BR169S1 is a tactical light-weight carrier vest, which was designed for concealed wear. It has the option to contain soft ballistic plates, and in addition to that, a small hard plate in the torso area. It is made from stylish and durable cordura material, and lined with webbing on the inside. The whole front and back side are lined with velcro, for adding patches and insignia. The vest has adjustment options by using the strong elastic band, which is stuck to the front side. In this elastic, there are two integrated pockets for storage (fit for ammo-magazine, or radio station). On the front there are two openings, made for integrating the headphones - for covert work.

PRODUCT CODE

- Unisex: BR169S1
