

TACTICAL CARRIER VEST BR172

TECHNICAL DATASHEET

The vest BR172 is a sturdy ballistics carrier. It was designed for external wear and has the option to contain soft, supplemental hard, or both types of ballistics protection plates. It offers the MOLLE attachments systems which enables the user to add additional gear and cargo bags. It has options of adjustments with velcro, for comfortable wear on the shoulders and on the sides. This model has sturdier and reinforced shoulder bands, and side ballistic overlap. The carrier has the options for adding various velcro options for the patches. There is a holder on the back side for carrying the vest, or to pull the user out of the danger zone. The inner side is lined with foam, which contain air channels, that offer extra cooling to the user. For fast vest removal, there are quick-release buckles available on the shoulder and the sides part. The vest has extra storage pockets.

PRODUCT CODE

- **Unisex:** BR172
