

TROUSERS TACTICAL H699S7

TECHNICAL DATASHEET

These trousers are suitable for dynamic, tactical and comfortable movement in any indoor or outdoor scenario. The durable material can withstand excessive wear, and with numerous reinforcements significantly increases the lifespan of the trousers. The main advantage is in the perfect relationship between high-quality materials and reinforced parts, a large number of pockets and many tactical functional details. They are a multifunctional garment with a certain degree of water and wind resistance and they provide high degree of adjustment and comfort.
