

TROUSERS TACTICAL H697

TECHNICAL DATASHEET

The tactical trousers H697 are made for dynamic movement, as the main advantage is the stretchy fabric, which enables swift, tactical and comfortable movement in any tactical scenario. The durable material can withstand excessive wear, and with numerous reinforcements significantly increases the lifespan of the trousers. There is a fine line between the usage of high-quality materials and reinforced parts, a large number of pockets and many tactical functional details. They are a multifunctional garment with a certain degree of water and wind resistance and they provide high degree of adjustment and comfort.
